

TUM BLOCKCHAIN CONFERENCE 26 + Hackathon

29–31 October 2026

House of Communication, Munich

A conference that sets the intellectual tone. A hackathon where ideas become reality overnight. Born at TUM — built for the entire blockchain ecosystem.

THREE DAYS, THREE FORMATS

29 Oct

Conference Day

30 Oct

Digital Assets Day

DIGITAL ASSETS DAY
by Bundesbank

30–31 Oct

Blockchain & AI Hackathon

Special student prices

A non-profit, student-run conference — students get a dedicated ticket tier with a valid student ID.

THE PROGRAMME

29 Oct

Conference Day

Talks, panels and workshops across education, research, ecosystem, applications and regulation — from zero-knowledge cryptography to production systems.

30 Oct

Digital Assets Day

Curated for the first time by Bundesblock: policymakers, regulators, financial institutions and corporates on the future of digital assets in Europe.

30–31 Oct

Blockchain & AI Hackathon

Two days of building alongside the conference, open to all levels — partner tracks, prizes, and a room to find a co-founder in.

WHY COME

Research and industry, same stage.

Academic cryptographers and protocol researchers speak next to the teams running mainnet infrastructure.

Build, don't just watch.

The hackathon turns ideas into working prototypes in two days. Some teams leave with a project — or a co-founder.

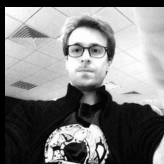

Policy you can't get on a livestream.

Digital Assets Day puts regulators, banks and corporates in the room with builders — MiCA, the digital euro, tokenisation.

1,200+ people worth meeting.

Developers, founders, VCs, researchers, corporates and students — Munich's ecosystem in one building, plus side events.

PREVIOUS SPEAKERS

Justin Drake

Researcher, Ethereum

Jordi Baylina

Developer, Zisk

Dr. Friederike Ernst

Founder, Gnosis

Paul Brody

Global Blockchain Leader, EY
